?

← Select start-up disk

Please select a virtual optical disk file or a physical optical drive containing a disk to start your new virtual machine from.

The disk should be suitable for starting a computer from and should contain the operating system you wish to install on the virtual machine if you want to do that now. The disk will be ejected from the virtual drive automatically next time you switch the virtual machine off, but you can also do this yourself if needed using the Devices menu.

Installing system

Welcome

- Thank you for choosing Ubuntu 10.04 LTS.
- This release marks a major milestone in the Ubuntu project. It is easier and more reliable than ever, with hundreds of improvements including a new video editor, integrated social networking and a growing selection of extra software.
- Whether you're new to Ubuntu or a long-time user, we're sure there is something you will enjoy. While Ubuntu is installed, this slideshow will show you around.

Ubuntu is designed to be easy. Feel free to explore!
